

WINDOWS | DOORS

Quality PVC-U products

# Specialists in what we do

Trust us – we've been making our PVC-U products in Bandon, Co. Cork since 1997.

We use the latest manufacturing techniques and a dedicated workforce to deliver great windows and doors.

Our business has been growing 100% year-on-year because we do the job right, and because we listen to our customers.

Your customers are important to you, and your customer service depends on your suppliers. We know that consumers are more demanding than ever before, wanting the best in technology and design. We know that you need exceptional quality with every order. We know that you need a responsive and reliable supplier. And we know that you want all of the above and competitive pricing.

Our custom-made products use only the best components from premium suppliers and our range is comprehensive: whatever the project, we'll be able to help.

## Better than the rest

- We take your job seriously. Our business depends on providing you with great service, on every single order, large or small.
- We've invested in our manufacturing plant, our techniques and in our skilled workforce. Our combined approach delivers state of the art quality, time after time.
- We only ever supply products that are up to the job. The best materials, the best designs, and the latest technology. We don't do half-measures.

## With you every step of the way

All businesses do better with support. When your core business is the supply and installation of windows and doors, that's what you should be doing, not chasing about, worrying about other things. You can rely on us to deliver exactly what you want, right when you want it.

We take the hassle out of sourcing your windows and

doors. We make all styles and offer the choice you would expect from a major manufacturer. And unlike some competitors, our products are designed for the Irish market. Our windows and doors are built for our climate with advanced weather resistance, durability and thermal efficiency.

We don't expect you to compromise and you won't need to. We've controlled the costs so that our quality and service is affordable. Our range is complete: there are no holes to fill and you can source everything from us. What's more, our frames are built for ease of installation. We're determined to make your job simpler.

# PVC-U products

PVC-U is great for windows and doors:  
it's no surprise that its use has grown  
enormously since the early days.

Modern developments have increased the  
benefits and PVC-U is better than ever before. It  
is strong, lightweight, long lasting and surprisingly  
environmentally friendly.

The range of options continues to expand and today's  
consumers know what they want. They're looking  
for energy efficiency and high security, but that  
doesn't mean they will compromise on appearance.  
PVC-U windows and doors have to have it all: looks,  
durability, performance, and affordability.

The best window systems tick everyone's boxes  
– consumers and installers. They provide choice,  
flexibility, technical excellence and insulating qualities.  
They keep homes warm and safe and, for those in  
the installation trade, they are great to work with,  
complete and easy to install.

## The right solution

- System designed for Irish market and simple to install
- Highly accredited products
- Products comply with latest CE Marking Regulations
- Complete system with a 10-year PVC-U guarantee
- Wide choice of colour, finish and profile shape
- Multi-chambered, thermally efficient system
- PCE gaskets for extended life, aesthetics and superior weather protection
- 24-44mm glazing options

## The Elite solution

We use Spectus Elite 63 and Elite 70 profiles, designed and manufactured for our market by leading supplier Spectus Systems. These products meet the highest standards in the industry.

High levels of thermal and sound insulation are achieved without compromising

appearance and low U-values mean warmer homes. Post-co-extruded low-line gaskets are aesthetically pleasing and weather resistant. Materials are formulated for superior weathering and a wide choice of hardware supports secure, safe homes.

With the Elite 63 and Elite 70 systems, everything is compatible, and all products work together across the range. And importantly for fitters, it's been engineered to be very easy to use.

# Windows

Our windows are suitable for all houses and for commercial premises. It doesn't matter if it's a new-build or a rustic cottage, if it's a high-rise or a stylish town house, we can fabricate the perfect window. All of our profiles work together so that a range of window types can be used on one project without compromising appearance.

## We manufacture:

**Casements** – Traditional open out windows with top or side-hung vents.

**Tilt & Turn** – Smart and practical windows that hinge and open inwards for ventilation and easy cleaning.

**Vertical sliders** – Sash windows with period styling and 21st century performance.

**Reversible** – 360° rotating windows, perfect for high-rise or inaccessible locations.

## Features and benefits

- All windows can reach B and A+ for energy efficiency. Heat loss is reduced with multi-chambered profiles and appropriate glazing. All windows are supplied with the relevant BER rating certificates.
- Windows built to withstand the weather with post co-extruded concealed gaskets, flush glazed for appearance and improved seal.
- Elite 63 profile system recognised across the industry as being complete, fully integrated and very easy to install.
- Highly accredited products meeting numerous standards for performance, security, quality and responsible sourcing.

## Choice

All windows are available in white and a wide choice of colours and finishes giving more choice for your customer and more superb looking installations for you. Bold colours are a striking option for modern or commercial premises and classic foiled white or cream finishes give an authentic painted timber appearance. Wood effect finishes can be selected to

complement brick, stone or timber building materials. Matching stylish windows to the property has never been easier.

You can offer a genuine triple glazed option with a 44mm glazing gap to provide one of the most thermally efficient windows on the market.

Cills and matching end caps are available in 85mm, 110mm, 150mm, 180mm and 225mm sizes in all colours and finishes.

Choice of frame shape from traditional or slim bevelled frames to contemporary ovolo designs. These enable a match to any existing glazing and ensure a perfect fit for any property.

# Vertical sliding sash windows

Combining the traditional appearance of the period sash window with the best of modern materials and design, the Spectus Vertical Slider is a feature packed, cost effective solution for replacing traditional timber sashes. Consumers who may be struggling with cold homes and draughty windows now have a sensible option.

Made from high performance long lasting materials the vertical slider is strong, durable, has excellent weathering capability and is low maintenance. Windows are easy to operate with smooth balance mechanisms and a host of safety and security features.

Ovolo shaped frames give an authentic appearance, and tilting sashes are easy to clean. Our vertical sliders are fully customisable with a range of choices to match existing glazing or mimic timber sashes. Thermal performance is enhanced with pile-sealed sashes and with 24mm glazing, frames can achieve Band A energy ratings without compromising appearance.

All our vertical sliding windows are available in a wide choice of colours and finishes.

## Features and benefits

- 128mm outerframe to replicate timber sash dimensions
- Suitable for windows up to 1600mm wide by 3000mm high
- Post co-extruded gaskets for aesthetics and superior weather resistance
- Draughts prevented by pile-sealed sashes
- Inward tilting sashes for easy cleaning
- Trickle or glazed in vents
- 10-year guarantee
- Designed to achieve BER Band A+ with 24mm glazing and multi-chambered profile

## Options - Fully customisable with a range of choices:

- Deep bottom rail option
- Choice of cill sizes with matching end caps
- Optional Georgian bar detail
- Optional moulded or through horn detail
- Wide range of colours and finishes
- Large and small sash options
- White, chrome or brass hardware
- Fire escape option fully compliant with Fire Egress specification

# Doors

We manufacture and supply all types of doors. Like everything else we do, we insist on high standards. Our range includes PVC-U entrance doors, French doors and sliding patio doors.

Whatever your customer is looking for, we will be able to help. Our doors are suitable for all styles of home, from modern architecture to rural cottages; but whatever the style, there are great features in common and you will be able to ensure a top quality installation.

### Residential entrance doors

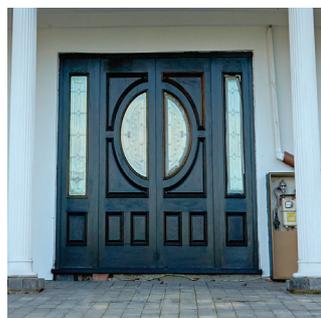

The perfect choice for front or back doors, our residential PVC-U doors are strong, durable and good-looking. Built to perfectly complement our window frames, they are high performance and very easy to maintain.

Our doors come with double-glazed, toughened safety glass as standard. To accommodate wider openings we offer full or semi-glazed side panels, fully customisable with midrails for letter plates.

Weather and draught-proof, and highly insulated, our doors are Part L compliant for thermal efficiency (subject to appropriate glazing) and will meet or exceed current Building Regulations of minimum 1.8 U-value.

### Features and benefits

- Easy to install and compatible with our window frames
- Wide range of colours and finishes
- Highly secure with choice of handles and hardware
- Superior weather protection with draught-proof seals and integral drainage
- Fully accredited and guaranteed to last
- Highly insulated for improved energy efficiency and Document L compliant
- Choice of glazing design
- Can achieve PAS24 specification
- Meets minimum specification 1.8 U-value

# Patio and French doors

Patio and French doors are more popular than ever before. More and more consumers want to enjoy the benefits of a light and airy home and easy access to their gardens.

## Sliding patio doors

The simple and attractive style of our sliding doors is perfect for all homes and is especially suitable for apartments where space may be tight. The large expanse of glass means fewer vertical bars and uninterrupted views.

Our sliding doors aren't just suitable for patios and give you plenty of opportunities for installation in conservatories, garden rooms, outdoor offices, porches or even internally to divide living spaces.

The Spectus sliding patio door is highly secure with multipoint locking and outward opposing hooks to prevent the opening pane being lifted from the frame. Easy to fit and cost effective the doors are fully compatible with our windows.

## Features and benefits

- 2, 3 or 4 pane options, with choice of inner or outer sliding pane
- Optional mechanical outerframe for easy transportation to site
- Dedicated frame coupler
- High security four hook locking mechanism
- Purpose designed optional midrail which can incorporate a letter plate
- Wide choice of colour and finish
- Fully compatible with window frames
- 10-year guarantee

## French doors

Classic French door styling without a central mullion allows rooms to be fully opened up and provides a beautiful solution where sliding doors would look too modern.

Fabricated from the versatile Elite 63 range of multi-chambered profiles our French doors are fully compatible with all our frames and are easy to install.

Frames are available in traditional or slimline bevelled shape or contemporary ovolo to allow a match with other glazing styles in the property.

## Features and benefits

- Inward or outward opening options
- Double or triple glazed, for high thermal and sound insulation
- PCE concealed gaskets for superior weatherproofing and long life
- Traditional or slimline bevelled or ovolo shaped frames
- Choice of hardware
- Wide choice of colour and finish
- Optional aluminium low thresholds for disabled access
- 10-year guarantee

# Installation Gallery
